

# My Uncle Chris Evans

# Who is your relative?

My uncle's name is Chris Evans. He lives in the suburbs about an hour away from downtown Chicago. He is married to my aunt Jennifer. They have two daughters my cousins Grace and Ashley Evans. He is my godfather and was always nice to me.

## What did he do?

My uncle has the ability to take apart computers and rebuild them and fixing them. He can take computers and make 2 into one that is better than either of the computers he started with.

When did this individual live... what year were they most active in their career/lives?

My uncle right now is about 50 years of age and he is still doing what he loves which is working with computers. He is always been active in his career and will stay that way as long as he can still do his job.

Where did this individual live? Were there any outside protagonists there that led them to do incredible things?

My uncle live about an hour away in the suburbs in Chicago. Some that lead him to this was is father my grandfather who had many computer problems. My father also influenced him because he got into computers and technology and then my uncle his younger brother followed in his footsteps. Then his other brother my other uncle who is the oldest again was interested in computers after leaving the military.

# Why did they do what they did?

My uncle started working on computers to help others by being able to know what needs to be done so everything is ok. He helps my entire family because he is able to help others make their lives easier.

Did their accolades occur over time, did it happen quickly. How did they leave their mark on you?

My uncle left his mark on my about 3 years ago when we went to his house. I overheard him fixing my dad's computer and I was interested in how he knew all about the computer and how to fix it. I have been interested every since.
